DID YOU KNOW?

- **Australia's Great Barrier Reef** is the **world's largest living structure**, covering about 133,000 square miles. That's greater than the United Kingdom, the Netherlands, and Switzerland combined. Astronauts can even see it from outer space. The reef stretches approximately 1,500 miles along the coast of Queensland, in eastern Australia, and **shelters billions of living species**.
- Since the ocean covers more than 70% of the Earth's surface, it probably comes as no surprise that it's swarming with colorful creatures. But perhaps more surprising is that researchers estimate that **94% of all life on Earth is aquatic!**

IN OTHER WORDS...

"I still believe that standing up for the truth of God is the greatest thing in the world. This is the end of life. The end of life is not to be happy. The end of life is not to achieve pleasure and avoid pain. The end of life is to do the will of God, come what may."

—Martin Luther King, Jr.
