**DID YOU KNOW?**

- As recently as **1995**, only **1%** of the world's population had **internet access** at their fingertips (and probably a painfully slow dial-up connection at that).
- **Today**, over **40% of the global population** uses the **internet**, led by **China**, with about **854 million** of its 1.4 billion residents accessing.
- Next on the list are **India** (560 million users), the **United States** (293 million), **Indonesia** (171 million), and **Brazil** (149 million).
- The comparatively tiny nation of **Iceland** boasts the highest percentage of internet users in its population, with **98.25% having access to the web**. On the opposite end of the spectrum is the **African country of Eritrea**, with only **1.31% of its population** connected to the Internet.

**IN OTHER WORDS...**

"Would you find me faithful in what it is you've called me to do, oh God! I'm convinced if the answer is yes, the other things we need will fall into place."

—**John Sorensen**

**Weekly Verse**

But the Advocate, the Holy Spirit, whom the Father will send in my name, will teach you all things and will remind you of everything I have said to you.

Peace I leave with you; my peace I give you. I do not give to you as the world gives. Do not let your hearts be troubled and do not be afraid.

**John 14:26-27 (NIV)**
